

FROM ASIA TO THE WORLD

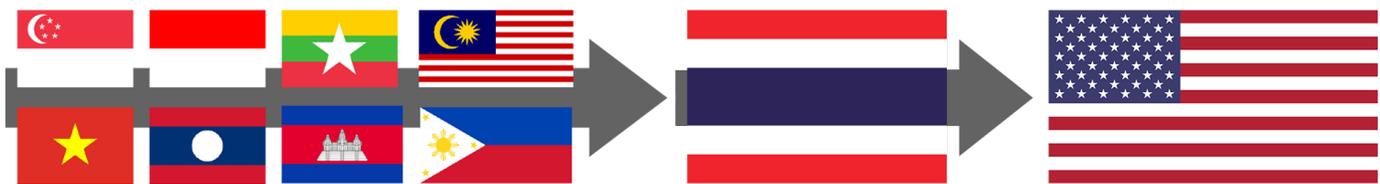

Introducing: KWE's BKK Gateway Service to ORD and LAX

Trans-Pacific supply chains are among the most intricate for companies to establish, with almost as many moving parts as a jet engine. The Kintetsu World Express **BKK Gateway Service** consolidates shipments from eight Southeast Asian countries into Thailand's Bangkok Airport (BKK) for quick trans-Pacific transport to the Chicago (ORD) and Los Angeles (LAX) gateways. As your business grows, let Kintetsu World Express take the load off your shoulders and push your international operations to the next level.

CLOSING THE GAPS

Space and pricing in the trans-Pacific region have always been subject to the instability of market conditions. To solve this, KWE utilizes its Block Space Agreements with multiple airlines to maintain annual space availabilities of up to 100 tons each destination per month while retaining cost stability for our clients. With reliable in-house handling operations and fixed delivery schedules, KWE is committed to closing the gaps in your international supply chain.

KWE consolidates into Thailand from the following countries: Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, and Vietnam.

ON TIME, EVERY TIME

KWE's BKK Gateway Service can be tailored to fit your supply chain needs with tiered transport options. Our many airline carriers and in-house operations teams are equipped to safely handle all types of cargo, with C-TPAT certified methodology for damage control, certified Container Freight Stations (CFS), and dedicated account management to provide global oversight.

	Destination	Time
	Origin — BKK ¹	1 Day <small>(arrival by 18:00)</small>
	BKK — ORD & LAX	2 Days
	Total Transit Time	3 Days

¹: Advanced booking required.
