

# 100% Cargo Screening

## On Commercial Aircraft, Effective June 30, 2021

**On June 30, 2021**, the harmonized cargo screening mandate—first declared in 2016 by the International Civil Aviation Organization (ICAO)—will be enforced by all member nations.

KWE has been screening since August 2010 when screening of air cargo carried on passenger aircraft was mandated in the U.S.

KWE remains well-positioned to manage the recent cargo screening mandate of all-cargo aircraft.

KWE operates eight certified cargo screening facilities across its U.S. network, utilizing a substantial mix of screening technologies.

As always, KWE will continue to screen select cargo at these facilities, with the remainder to be appropriately screened by its air carrier partners.

For more information on how the 100% cargo screening mandate may affect your supply chain, contact your [local KWE representative](#).
